

Lifetime Skin Care Centers is an established physician owned private practice, looking to add another dermatologist to our team. We have a very busy office that has a mix of board-certified dermatologists and nurse practitioners. A CLIA certified Mohs and pathology lab with a board certified dermatopathologist on site. We have a large number of referrals and you will be as busy as you want to be from day one with no general dermatology required unless you want it.

Our practice is in a medium sized college town with excellent schools and amenities. Indianapolis is a mere 45 minutes away with all the advantages of a big city. We draw from 6 counties and are centrally located for most of our patients. Our town is a part of the rails-to-trails program and we have access to over 60 miles of well-maintained trails for walking, running, or biking. We also have Prairie Creek Reservoir which is available for sailing boating, fishing, and swimming.

We are seeking a board certified or board eligible dermatologist. If patient care is your passion, we can provide you with a great place to practice, an unparalleled staff and outstanding culture. We offer competitive production-based compensation. We would like a dermatologist as soon as possible but are willing to wait for the right candidate and stipends are possible.

Lifetime Skin Care Providers Benefit From:

- Excellent reputation in the community resulting in a patient base that provides patient referrals as well as referring physician referrals
- A team of well trained, dedicated support staff
